Weather Bureau Entertains No Hope of a Thaw.

Light Fall of Snow Predicted for Tonight or Tomorrow.

Comparison of Washington With Other Cold Regions and the General Official Forceast.

It was colder in Washington last night than ever before since the establishment of the Weather Bureau. That is, it was older than at any other time since 1870. The minimum temperature recorded last night was 15 degrees below zero. This emperature was registered by the thermometer on the roof of the Weather Bureau building. It was probably three or five degrees colder in the streets in the w parts of the city.

The lowest temperature previously reorded in this city was on the night of December 31, 1880, when the mercury indiated 13 degrees below zero and on the orning of January 1, 1881, when the tem-grature was recorded as 14 degrees below. There is no prospect of a thaw. The in-ications are that there may be a slight ise in the temperature, but it will be tut temporary rally.

The forecast for the District of Columbia

that a light snow may fail tonight or morrow. It may not be so cold tonight is it was last night. The wind will be risk and will blow from the northeast. stonishing Report to the Commissioners From Intendant Stontenburgh.

In a special report to the District Comnissioners this afternoon W. H. Stoutenburgh, Superintendent of the Washington Asylum, which includes the workhouse and almshouse, makes public the wretched conditions existing at that institution as regards accommodation of prisoners and in-The astonishing statement is made that

110 out of a total of 409 prisoners carried on the rolls are without sleeping accommodations. Lack of bunks and space compels these prisoners to sleep on the cold, hard floors. Ten of the unaccommodated prisoners are colored youths not yet foureen years of age. They are committed to the workhouse on charges of disorderly-assembly and sentenced to from thirty to

Intendant Stoutenburgh places great stress on the improper accommodation for these boys. He thinks that contact with older and more experienced criminals tends to degenerate them and ruin them morally and physically, and suggests that no more youths under sixteen years of age be sent to the workhouse. The report of Intendant Stoutenburgh is in full as follows:

The number of male prisoners carried on the rolls of the institution today is 209 white men and 290 colored men, making a total of 409 prisoners. They are located, bled in bunks, making a total of 239 pro-vided with sleeping accommodations and leaving 110 to be provided for. Of this number three white and one colored are in the hospital sick: three white men are on detail at the almshouse and one colored of age and under, committed on charges Fifth Avenue pharmacy, who said:

lems with which I have to deal. Every sentiment and consideration for the ref-ormation and betterment of these boys, morally and physically, is against their coming in contact and association with the older and hardened inmates of this work-

ing sentenced to the workhouse in the fu-ture. Their parents, the Board of Children's Guardians, the Industrial School, or the Reform School for Boys would seem to be the proper agencies to correct the evil ten-dencies, and secure the reformation of boys under sixteen years of age. Surely the workhouse is no place for him.

THE GRIP EPIDEMIC

Opinions of New York Physicians to Cause and Cure.

(New York Exchange.) There is probably no family in the city of which some member is not laid up, or at

east attacked by the grip. While grip is the same old enemy, it eems to be very different this season from other years. On the streets and street cars and in the churches one meets with people violently speezing, with running eyes. sion on their faces. Like all epidemics of this kind, few are exempt. It attacks the rich and poor alike and physicians are be-

ing worked night and day. To obtain reliable information on this most important subject, a reporter recently called upon some well-known physicians to tion to it.

All agreed on the opinion that the malady was rapidly increasing and that in most cases it was of an extremely dangerous nature.

One medical man, who is said to have treated no less than one hundred grip patients in assingle week, said to the reporter:

"Serious results will always follow ar attack of the grip if it is not properly treated. Often it runs into pneumonia and always it leaves unpleasant or dangerou complications. It seems to be different this year from ever before. My experience has shown that the worst grip comes when the body is clogged up and when the secretions fall to have the right exit.

"Have you ever seen a sewer or a drain clogged? Well, that is precisely the condition of the body that invites grip. The fluids have no means of escape, and so they back up and flood everything, just as a clogged sewer floods the street. Is this not natural? It is certainly true

"When a person is attacked by grip." the doctor continued, "he should not try to as far as sleeping accommodations are con-cerned, as follows: 103 white men in bunks, 23 white men doubled in bunks, 108 colored men in bunks, 50 colored men dou-bled in bunks, making a total of 299 profight off the sensations of cold, aching
